### Description

MD MASUM, a staffing and recruiting company, is seeking a Web Developer to join our growing team. In this role, you will be responsible for developing, testing, and maintaining our company website and enhancing its user interface and experience. You will work closely with our marketing and IT teams and be a key player in driving website traffic and customer engagement.

### Responsibilities

- Develop and maintain the MD MASUM website using various programming languages and tools.
- Collaborate with marketing and IT teams to ensure website content is up-to-date and functional.
- Optimize website loading speeds and ensure compatibility across different platforms and browsers.
- Implement website security measures to protect against cyber threats and hacking.
- Use data analytics to gather insights and make recommendations for website improvements.
- Stay up-to-date with new web development technologies and best practices to continuously improve site functionality and performance.
- Troubleshoot and fix website bugs and compatibility issues.

### Requirements

- Bachelor's degree in Computer Science or a related field.
- Proven experience as a Web Developer with a strong portfolio of websites.
- Proficiency in programming languages such as HTML, CSS, JavaScript, and PHP.
- Experience with web development tools like WordPress, jQuery, and Git.
- Knowledge of SEO and Google Analytics.
- Ability to identify and troubleshoot website issues and bugs.
- Good communication and collaborative skills.

It will work like react tab.

```
{  
  path: '/overview',  
  element: <Overview />  
}
```

- Please if need to create any page, please create like this
